

Become a certified professional in supply chain, logistics and transport

**SCHOLARSHIPS
AVAILABLE***

**Session 2017
ADMISSIONS OPEN**

*limited scholarship available on merit cum need base

ABOUT THE COURSE

CILT in collaboration with Empower and PKGSC has designed the course to impart knowledge and skills to the participants regarding supply chain management. The curriculum comprises of 10 modules. The program blends practical skills with theoretical concepts. The methodology consists of real life case studies and problem solving guide with an emphasis on practical learning. This is a facilitated learning program where mentorship will be provided by an experienced faculty throughout the program.

The course provides an overview of Supply Chain and Logistics covering the functional and supportive areas of supply chain. The course structure focuses on issues highlighting the role of government policies, donors and manufacturers. It also provides technical know-how for making the link between products and consumers through manufacturers, service providers and facilities. It will enhance the understanding and knowledge regarding continuous availability of supplies for high efficiency and performance. This course empowers SCM professionals, Logisticians, Program Managers and Policy makers of various industries like aerospace, automotive, chemical, fresh food, manufacturing, healthcare etc., to achieve excellence in their profiles. The course builds the background knowledge and skills of the participants in a step-wise manner to make them self-sufficient in designing and implementing supply chain and logistics frameworks and syncing various aspects of supply chain management with the industrial priorities.

Each step of assessment starting from assignments, course work and examination will be conducted/submitted online. Experienced international faculty will hand-hold the necessary competencies to the participants for excelling in their respective job profiles.

OBJECTIVES OF THE COURSE

- To provide a leading efficient platform for preparing students for a successful global career in supply chain, logistics and transport
- To impart a thorough understanding of the fundamentals of supply chain, logistics and transport and its linkage with their respective field
- To help learn management structures and systems required for effective operations of supply chain, logistics and transport
- To enable participants to access and address bottlenecks of supply chain, logistics and transport, helping them in designing projects to make the process more effective
- To accelerate personal and professional growth in terms of leadership and management

TARGET AUDIENCE

Supply chain professionals who are moving into, or already within administrative positions but require training and professional development. It's also ideal for graduates with non-business degrees moving into the supply chain and logistics field.

Candidates are required:

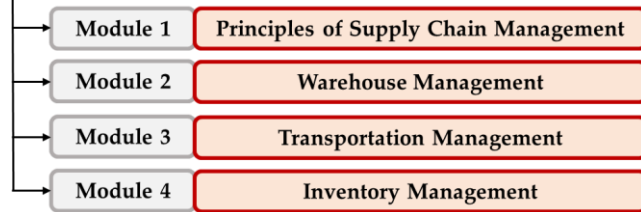

- To have completed, at minimum, a bachelor's degree in any discipline
- To be able to operate confidently in both written and spoken English language
- To be able to commit the required hours per month over the entire duration of the course
- Prior work-experience is preferred, though not necessary

By the end of the course, students should be able to:

- Develop an understanding of individual components of the supply chain (such as purchasing, transportation, network design, channel management, demand forecasting) and their inter-relationship with other functions of the organization like marketing, manufacturing, accounting etc.
- Develop problem-solving skills necessary to develop solutions for logistics problems.
- Develop the ability to design supply chain and logistics systems, so that all components are synchronized and fit in with the corporate strategy, competitive realities and market needs.
- Develop core competency in designing and operating a warehouse.
- Get an understanding of IT in supply chain and the use of ERP/CRM.
- Conceptualize and apply inventory management principles in real environment.

Certificate Course

For obtaining the Certificate course, the participants will have to clear the four basic entry level modules of the course. This will be a foundation course to build basic concepts on Supply Chain Management, logistics and transport and is useful for field staff handling these activities on a day-to-day basis.

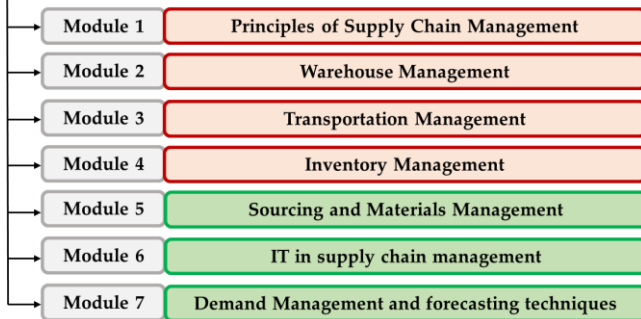

INR 17,500 which includes:

- Certificate from CILT, Empower and PKGSC
- E-tutoring and mentoring for case study
- 6 months of technical support on any topic related to your work or this course

Diploma Course

For the successful completion of the advanced level Diploma course, participants will attempt three additional modules. This will be an intermediate level course to build the capacity of mid-level managers for managing the SCM activities on their job.

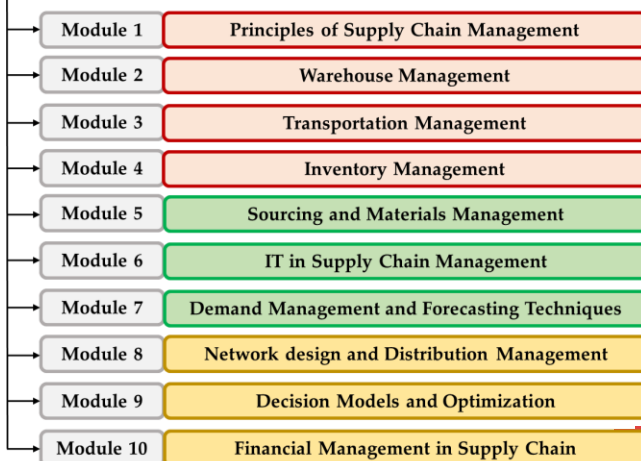

INR 27,500 which includes:

- Diploma certificate from CILT, Empower and PKGSC
- E-tutoring and dissertation mentoring
- 11 months of technical support on any topic related to your work or this course
- Annual CILT Membership

Professional Diploma Course

The course allows the interested participants to enrol for proficiency level Professional Diploma course as well, where all ten modules of the curriculum need to be cleared. This will impart an in-depth knowledge of the subject and will facilitate skills for policy level or top managerial level participants.

INR 42,500 which includes:

- Diploma certificate from CILT, Empower and PKGSC
- E-tutoring and dissertation mentoring
- 15 months of technical support on any topic related to your work or this course
- Internship and live project opportunities with leading organizations for top performers
- Annual CILT Membership

ABOUT US

The Chartered Institute of Logistics and Transport (CILT)

The leading global professional body and international voice for everyone who works in supply chain, logistics and transport, with 33000 members working in over 100 countries.
